WORK EXPERIENCES

COZ Software Developer | Remote | United States (2024 - present)

Currently involved in the development of Neon Wallet and blockchain-related projects, with a focus on secure, decentralized solutions. Works with React, TypeScript, Redux, Electron, Tailwind CSS, and NodeJS. Responsible for implementing E2E tests using Playwright and documenting data structures.

PERFORMA_IT Front-end Developer | Remote | Campinas, São Paulo, Brazil (2021 - 2024)

Worked on e-commerce, crowdfunding, and financial platforms, refactoring screens and integrating ChatGPT and Pix. Specialized in technologies such as React, NextJS, ViteJS, and TypeScript, contributing to architectural improvements and security solutions. Actively participated in Scrum processes, collaborating with QAs and designers to enhance product quality and user experience.

VELOW SISTEMAS Front-end Developer | Hybrid | Blumenau, Santa Catarina, Brazil (2019 - 2021)

Develops and maintains web applications, including a corporate social network. Works with technologies like HTML, CSS, JavaScript, TypeScript, AngularJS, Angular, and more. Implements HTTP2, creates an Angular Library for the Design System, and trains new team members.

PROJECTS

NEON WALLET Blockchain | Financial (2024 - present)

Developed Neon Wallet for desktop and mobile, enhancing transaction capabilities across Neo N3, Neo X, and Ethereum networks. The revamped interface offers smoother navigation and quicker access.

HARVTECH Agritech | AI | Analytics (2024)

As part of Next 2024 by FIAP, an AI-driven solution is being developed to predict crop pests and diseases, optimizing field inspections through image analysis.

TERRA MEETING Administration | Fintech | Productivity | B2B2C (2023 - 2024)

Internal project for a major Brazilian investment firm, streamlining client meetings with experts through email and Microsoft Teams integration. Facilitates scheduling over 200 meetings monthly with features like feedback, expert connections, and scheduling.

MECHANIZE Tools | Mobile Apps (2023)

A mobile app connects clients with mechanics via geolocation and won second place at Next 2023. It features robust security, including Top 10 OWASP practices, encryption, and HTTP2.

CASULO SOCIAL Social Impact | Supply Chain (2022)

A mobile app connects clients with mechanics via geolocation and won second place at Next 2023. It features robust security, including Top 10 OWASP practices, encryption, and HTTP2.

ABACASHI Fintech | Social Impact | Crowdfunding (2021 - 2023)

Contributed to Abacashi, a leading Brazilian crowdfunding platform, by developing the Pix payment flow, campaign updates tab, and enhancing layout and navigation for an improved donation experience.

JOIN IN Human Resources | Social Media (2020 - 2021)

Developed a social media and HR platform to streamline operations with features like internal chat, birthday notifications, surveys, and meal tracking. Led the architecture, Design System, and key feature development.

EDUCATION

FIAP Bachelor's degree | Information Systems (2020 - 2024)

Gained proficiency in Python, JavaScript, Angular, React, and project management. Completed projects including an Arduino robot, a children's game, a supply chain system, and an app for predicting agricultural diseases. Acquired knowledge in UI/UX design, digital accessibility, cloud computing, and DevOps practices.

MICROSOFT Exam 70-480 (2020)

This exam assesses skills in developing web applications using HTML5, JavaScript, and CSS3, including creating user interfaces, managing data, and handling browser interactions.

COURSES AND CERTIFICATIONS

Angular and TypeScript, Database SQL, Clean Architecture, Web Accessibility Training, JavaScript, Frontend Training, Responsive Layouts, EcmaScript and NodeJS.
